## PROTECTING YOUR BRAND

### Are you protecting your Brand reputation online?

If false, misleading or inaccurate information is being circulated on the internet you need to tackle this problem before there is long term commercial damage to your business.

The source of information could be from an unhappy customer, a disgruntled ex-employee or a competitor. By not taking action you run the risk of allowing your Brand to devalue and this could have a serious impact on the profitability of your business.

We offer a service that will act like an early warning system monitoring what is being said about your business and evaluating potential damage to your Brand and provide you with the information to make the right decisions to counteract the negative comments.

and only one bad one to lose it"*
